COMMERCIAL INVESTMENT IN TUNIS LAKE DISTRICT

A DOUBLE-EDGED WEAPON ON ENVIRONMENTAL AND SOCIAL SCALES

CONTENT

01 Introduction

02 Literature Review

03 Methodology

04 Results

05 Discussions

06 Solutions

07 Conclusion

08 Limitations

INTRODUCTION

OBJECTIVES

- studying social and environmental challenges
- suggesting solutions

LITERATURE REVIEW

01 La Perle du Lac 1: The Venice of Tunis

(Al Buhaira Invest, 2016)

- **Well-presented project design and infrastructure**
- **Dearth of information regarding stakeholder engagement, and the social and environmental conditions.**

02 Les berges du succès

(Moncef MAHROUG, n.d.)

- **The examination of social and environmental issues**
- **Limited viewpoints of the community**

most of the studies reviewed work on one single region

METHODOLOGY

01 Collecting Data

02 Analyzing Findings and their Consequences

03 Suggesting Solutions

Secondary Research:

- **Qualitative Analysis**
- **Quantitative Analysis**

STUDY AREAS

Berges du Lac I & II – La Perle du Lac Project

Southern Shore (Rades and Ben Arous)

RESULTS

Berges du Lac I & II – La Perle du Lac Project

Flood Risks

The Increasing Concern of Floods and Soil Degradation

Displacement and Gentrification

Bigger Gaps between the Rich and the Poor

Excessive Energy Consumption

Energy Consumption Affected by Street lighting

RESULTS

Southern Shore (Rades and Ben Arous):

Air Quality and Pollution

Contribution of 30% of local industrial emissions

Traffic Congestion and Pollution

annual increase of 3-5% in NOx and particulate emissions

Youth Disengagement

Lack of Opportunities to participate in social and professional life

DISCUSSION

Berges du Lac I & II – La Perle du Lac Project

Challenge	Impact
Flood Risks	Rising Sea Levels/Soil Degradation
Displacement and Gentrification	Loss of Cultural Identity
Excessive Energy Consumption	Frequent blackouts and power outages, especially during peak hours

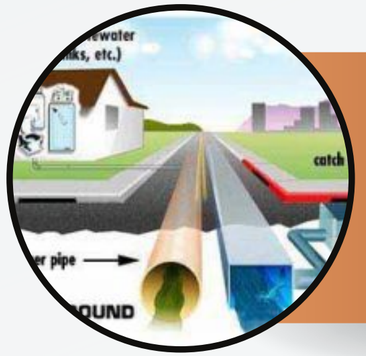
DISCUSSION

Southern Shore (Rades and Ben Arous)

Challenge	Impact
Air Quality and Pollution	Chronic Diseases/Children and Elderly Vulnerability
Traffic Congestion and Pollution	Productivity Loss/Fuel Consumption
Youth Disengagement	Increased Crime Rates / Brain Drain

SOLUTIONS

Berges du Lac I & II – La Perle du Lac Project



Upgraded Drainage Systems

Investment in modern stormwater infrastructure with advanced drainage pipes and retention basins.

Solar and Wind Integration

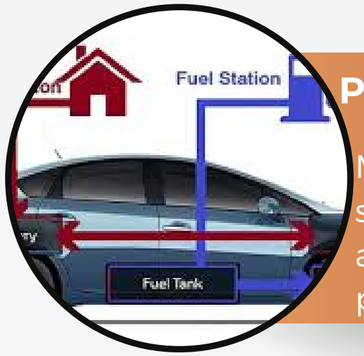
Promote the installation of rooftop solar panels, solar farms, and wind turbines in commercial and residential areas to reduce dependency on fossil fuels.

Affordable Housing Initiatives

Implement government-subsidized affordable housing projects to retain local residents.

SOLUTIONS

Southern Shore (Rades and Ben Arous)



Preservation and Expansion of Green Areas

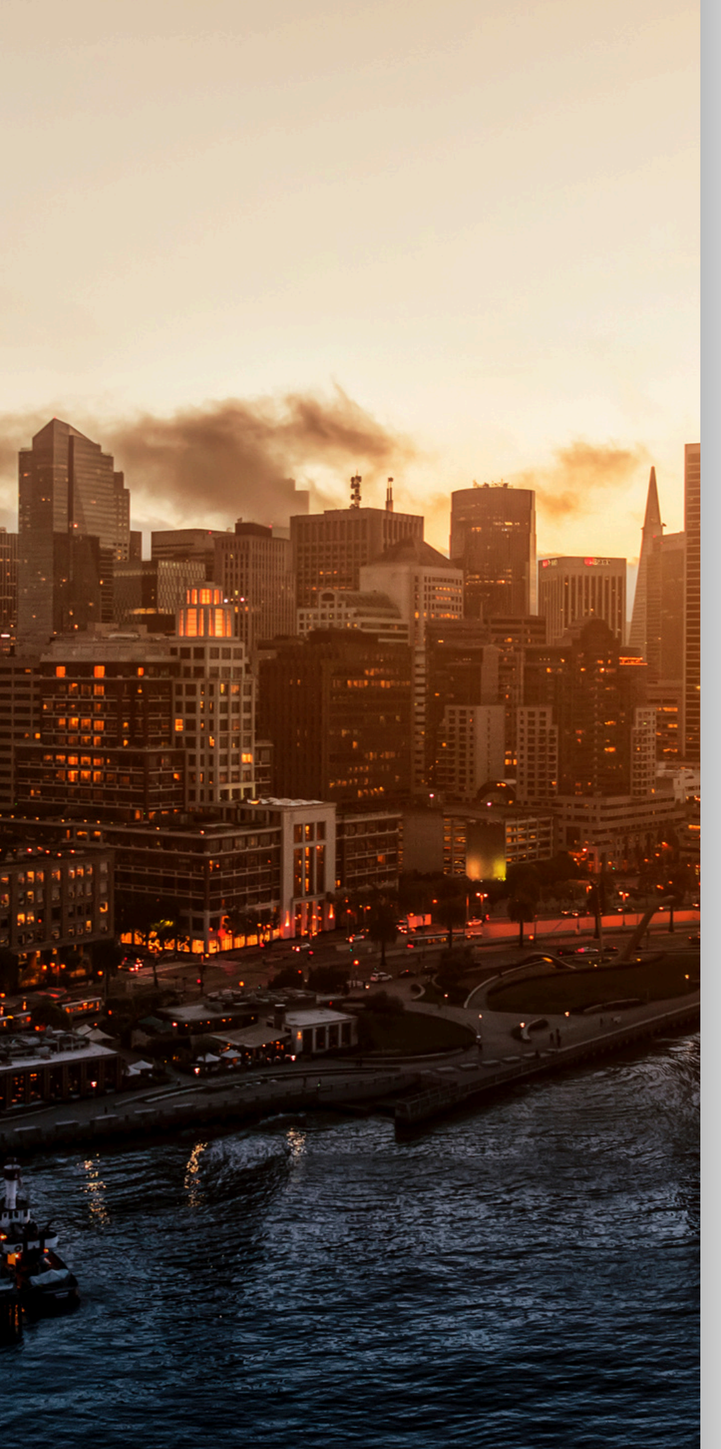
Maintaining and expanding urban green spaces, such as the Rades Forest, can improve air quality by acting as natural air filters. Community efforts to protect these areas are crucial.

Expansion of Metro and Bus Networks

Develop a more efficient public transport system, including bus networks and metro lines, to reduce reliance on private vehicles.

Support Small Businesses and Startups

Provide subsidies and financial support to startups and small enterprises, which can employ young professionals.



CONCLUSION

To sum up, several districts of Tunis Lake have experienced investments that have improved trade, but they have also resulted in social inequalities and environmental and health problems. Therefore, it is crucial to treat these issues seriously and direct public funds as well as private sector investments toward solutions that promote social justice and environmental sustainability.

LIMITATIONS

difficulties we have faced

Time Constraints

Insufficient Data

Managing the Research Parts
